

Summary of Re-audit Follow-Up Results

Below is a summary of a follow-up on sustainability requirements for a supplier to Sweden's regions. The summary reflects the results of the audit as well as activities carried out as a result. It has been updated continuously as new activities related to the follow-up have been conducted, until all potential non-conformities have been addressed and the follow-up is considered complete. For questions regarding the summary, please contact the Regional Office for Sustainable Procurement.

Re-audit Results

Summary of the Re-audit

Orion Pharma is assessed to meet all requirements and has demonstrated a systematic and well-structured risk analysis process in which high-risk suppliers have been appropriately prioritized for follow-up. The company makes good use of information from the industry initiative PSCI as part of its monitoring and follow-up activities, which strengthens the relevance and quality of its due diligence work.

The supplier's follow-up methodology is also well developed and clearly aligned with the prioritized risks, which have been assessed based on severity. This demonstrates a robust process with a high degree of transparency across the value chain. It is also viewed positively that the supplier has recruited new personnel with relevant expert competence in this area, further strengthening its capacity to manage sustainability risks in a structured and effective manner.
